Appendix 3

Excerpt from “Machinery of Democracy,” a Brennan Center Report

APPENDIX C

BRENNAN CENTER TASK FORCE ON VOTING SYSTEM SECURITY, LAWRENCE NORDEN, CHAIR

Excerpted from pp. 8-19

METHODOLOGY

The Task Force concluded, and the peer review team at NIST agreed, that the best approach for comprehensively evaluating voting system threats was to: (1) identify and categorize the potential threats against voting systems, (2) prioritize these threats based upon an agreed upon metric (which would tell us how difficult each threat is to accomplish from the attacker's point of view), and (3) determine, utilizing the same metric employed to prioritize threats, how much more difficult each of the catalogued attacks would become after various sets of countermeasures are implemented.

This model allows us to identify the attacks we should be most concerned about (*i.e.*, the most practical and least difficult attacks). Furthermore, it allows us to quantify the potential effectiveness of various sets of countermeasures (*i.e.*, how difficult the least difficult attack is after the countermeasure has been implemented). Other potential models considered, but ultimately rejected by the Task Force, are detailed in Appendix B.

IDENTIFICATION OF THREATS

The first step in creating a threat model for voting systems was to identify as many potential attacks as possible. To that end, the Task Force, together with the participating election officials, spent several months identifying voting system vulnerabilities. Following this work, NIST held a Voting Systems Threat Analysis Workshop on October 7, 2005. Members of the public were invited to write up and post additional potential attacks. Taken together, this work produced over 120 potential attacks on the three voting systems. They are detailed in the catalogs annexed. Many of the attacks are described in more detail at <http://vote.nist.gov/threats/papers.htm>.

The types of threats detailed in the catalogs can be broken down into nine categories:

- (1) the insertion of corrupt software into machines prior to Election Day;
- (2) wireless and other remote control attacks on voting machines on Election Day;
- (3) attacks on tally servers; (4) miscalibration of voting machines; (5) shut off of voting machine features intended to assist voters; (6) denial of service attacks; (7) actions by corrupt poll workers or others at the polling place to affect votes cast; (8) vote buying schemes; (9) attacks on ballots or VVPT. Often, the actual attacks

involve some combination of these categories. We provide a discussion of each type of attack in "Categories of Attacks," *infra* at pp. 24–27.

PRIORITIZING THREATS: NUMBER OF INFORMED PARTICIPANTS AS METRIC

Without some form of prioritization, a compilation of the threats is of limited value. Only by prioritizing these various threats could we help election officials identify which attacks they should be most concerned about, and what steps could be taken to make such attacks as difficult as possible. As discussed below, we have determined the level of difficulty for each attack where the attacker is attempting to affect the outcome of a close statewide election.

There is no perfect way to determine which attacks are the least difficult, because each attack requires a different mix of resources – well-placed insiders, money, programming skills, security expertise, *etc.* Different attackers would find certain resources easier to acquire than others. For example, election fraud committed by local election officials would always involve well-placed insiders and a thorough understanding of election procedures; at the same time, there is no reason to expect such officials to have highly skilled hackers or first-rate programmers working with them. By contrast, election fraud carried out by a foreign government would likely start with plenty of money and technically skilled attackers, but probably without many conveniently placed insiders or detailed knowledge of election procedures.

Ultimately, we decided to use the "number of informed participants" as the metric for determining attack difficulty. An attack which uses fewer participants is deemed the easier attack.

We have defined "informed participant" as someone whose participation is needed to make the attack work, and who knows enough about the attack to foil or expose it. This is to be distinguished from a participant who unknowingly assists the attack by performing a task that is integral to the attack's successful execution without understanding that the task is part of an attack on voting systems.

The reason for using the security metric "number of informed participants" is relatively straightforward: the larger a conspiracy is, the more difficult it would be to keep it secret. Where an attacker can carry out an attack by herself, she need only trust herself. On the other hand, a conspiracy that requires thousands of people to take part (like a vote-buying scheme) also requires thousands of people to keep quiet. The larger the number of people involved, the greater the likelihood that one of them (or one who was approached, but declined to take part) would either inform the public or authorities about the attack, or commit some kind of error that causes the attack to fail or become known.

Moreover, recruiting a large number of people who are willing to undermine the integrity of a statewide election is also presumably difficult. It is not hard to imagine two or three people agreeing to work to change the outcome of an election. It seems far less likely that an attacker could identify and employ hundreds or thousands of similarly corrupt people without being discovered.

We can get an idea of how this metric works by looking at one of the threats listed in our catalogs: the vote-buying threat, where an attacker or attackers pay individuals to vote for a particular candidate. This is Attack Number 26 in the PCOS Attack Catalog²² (though this attack would not be substantially different against DREs or DREs w/ VVPT).²³ In order to work under our current types of voting systems, this attack requires (1) at least one person to purchase votes, (2) many people to agree to sell their votes, and (3) some way for the purchaser to confirm that the voters she pays actually voted for the candidate she supported. Ultimately, we determined that, while practical in smaller contests, a vote-buying attack would be an exceptionally difficult way to affect the outcome of a statewide election. This is because, even in a typically close statewide election, an attacker would need to involve thousands of voters to ensure that she could affect the outcome of a statewide race.²⁴

For a discussion of other metrics we considered, but ultimately rejected, see Appendix C.

DETERMINING NUMBER OF INFORMED PARTICIPANTS

DETERMINING THE STEPS AND VALUES FOR EACH ATTACK

The Task Force members broke down each of the catalogued attacks into its necessary steps. For instance, Attack 12 in the PCOS Attack Catalog is “Stuffing Ballot Box with Additional Marked Ballots.”²⁵ We determined that, at a minimum, there were three component parts to this attack: (1) stealing or creating the ballots and then marking them, (2) scanning marked ballots through the PCOS scanners, probably before the polls opened, and (3) modifying the poll books in each location to ensure that the total number of votes in the ballot boxes was not greater than the number of voters who signed in at the polling place.

Task Force members then assigned a value representing the minimum number of persons they believed would be necessary to accomplish each goal. For PCOS Attack 12, the following values were assigned:²⁶

Minimum number required to steal or create ballots: 5 persons total.²⁷

Minimum number required to scan marked ballots: 1 per polling place attacked.

Minimum number required to modify poll books: 1 per polling place attacked.²⁸

After these values were assigned, the Brennan Center interviewed several election officials to see whether they agreed with the steps and values assigned to each attack.²⁹ When necessary, the values and steps were modified. The new catalogs, including attack steps and values, were then reviewed by Task Force members. The purpose of this review was to ensure, among other things, that the steps and values were sound.

These steps and values tell us how difficult it would be to accomplish a *single attack in a single polling place*. They do not tell us how many people it would take to change the outcome of an election successfully – that depends, of course, on specific facts about the jurisdiction: how many votes are generally recorded in each polling

place, how many polling places are there in the jurisdiction, and how close is the race? For this reason, we determined that it was necessary to construct a hypothetical jurisdiction, to which we now turn.

NUMBER OF INFORMED PARTICIPANTS NEEDED TO CHANGE STATEWIDE ELECTION

We have decided to examine the difficulty of each attack in the context of changing the outcome of a reasonably close statewide election. While we are concerned by potential attacks on voting systems in any type of election, we are most troubled by attacks that have the potential to affect large numbers of votes. These are the attacks that could actually change the outcome of a statewide election with just a handful of attack participants.

We are less troubled by attacks on voting systems that can only affect a small number of votes (and might therefore be more useful in local elections). This is because there are many non-system attacks that can also affect a small number of votes (*i.e.*, sending out misleading information about polling places, physically intimidating voters, submitting multiple absentee ballots, *etc.*). Given the fact that these non-system attacks are likely to be less difficult in terms of number of participants, financial cost, risk of detection, and time commitment, we are uncertain that an attacker would target *voting machines* to alter a small number of votes.

In order to evaluate how difficult it would be for an attacker to change the outcome of a statewide election, we created a composite jurisdiction. The composite jurisdiction was created to be representative of a relatively close statewide election. We did not want to examine a statewide election where results were so skewed toward one candidate (for instance, the re-election of Senator Edward M. Kennedy in 2000, where he won 73% of the vote³⁰), that reversing the election results would be impossible without causing extreme public suspicion. Nor did we want to look at races where changing only a relative handful of votes (for instance, the Governor's race in Washington State in 2004, which was decided by a mere 129 votes³¹) could affect the outcome of an election; under this scenario, many of the potential attacks would involve few people, and therefore look equally difficult.

We have named our composite jurisdiction "the State of Pennasota." The State of Pennasota is a composite of ten states: Colorado, Florida, Iowa, Ohio, New Mexico, Pennsylvania, Michigan, Nevada, Wisconsin and Minnesota. These states were chosen because they were the ten "battleground" states that Zogby International consistently polled in the spring, summer, and fall 2004.³² These are statewide elections that an attacker would have expected, ahead of time, to be fairly close.

We have also created a composite election, which we label the "Governor's Race" in Pennasota. The results of this election are a composite of the actual results in the same ten states in the 2004 Presidential Election.

We have used these composites as the framework by which to evaluate the difficulty of the various catalogued attacks.³³ For instance, we know a ballot-box stuffing attack would require roughly five people to create and mark fake ballots, as

well as one person per polling place to stuff the boxes, and one person per polling place to modify the poll books. But, in order to determine how many informed participants would be needed to affect a statewide race, we need to know how many polling places would need to be attacked.

The composite jurisdiction and composite election provide us with information needed to answer these questions: *i.e.*, how many extra votes our attackers would need to add to their favored candidate's total for him to win, how many ballots our attackers can stuff into a particular polling place's ballot box without arousing suspicion (and related to this, how many votes are generally cast in the average polling place), how many polling places are there in the state, *etc.* We provide details about both the composite jurisdiction and election in the section entitled "Governor's Race, State of Pennasota, 2007," *infra* at pp 20–27.

LIMITS OF INFORMED PARTICIPANTS AS METRIC

Of the possible metrics we considered, we believe that measuring the number of people who know they are involved in an attack (and thus could provide evidence of the attack to the authorities and/or the media), is the best single measure of attack difficulty; as already discussed, we have concluded that the more people an attacker is forced to involve in his attack, the more likely it is that one of the participants would reveal the attack's existence and foil the attack, perhaps sending attackers to jail. However, we are aware of a number of places where the methodology could provide us with questionable results.

By deciding to concentrate on size of attack team, we mostly ignore the need for other resources when planning an attack. Thus, a software attack on DREs which makes use of steganography³⁴ to hide attack instruction files (*see* "DRE w/ VVPT Attack No. 1a", discussed in greater detail, *infra* at pp. 62–65) is considered easier than an attack program delivered over a wireless network at the polling place (*see* discussion of wireless networks, *infra* at pp. 85–91). However, the former attack probably requires a much more technologically sophisticated attacker.

Another imperfection with this metric is that we do not have an easy way to represent how much choice the attacker has in finding members of his attack team. Thus, with PCOS voting, we conclude that the cost of subverting a routine audit of ballots is roughly equal to the cost of intercepting ballot boxes in transit and substituting altered ballots (*see* discussion of PCOS attacks, *infra* at pp. 77–83). However, subverting the audit team requires getting a specific set of trusted people to cooperate with the attacker. By contrast, the attacker may be able to decide which precincts to tamper with based on which people he has already recruited for his attack.

In an attempt to address this concern, we considered looking at the number of "insiders" necessary to take part in each attack. Under this theory, getting five people to take part in a conspiracy to attack a voting system might not be particularly difficult. But getting five well-placed county election officials to take part in the attack would be (and should be labeled) the more difficult of the two attacks. Because, for the most part, the low-cost attacks we have identified do not necessarily involve well placed insiders (but could, for instance, involve one of many people with access to commercial off the shelf software ("COTS") during development.

or at the vendor), we do not believe that using this metric would have substantially changed our analysis.³⁵

Finally, these attack team sizes do not always capture the logistical complexity of an attack. For example, an attack on VVPT machines involving tampering with the voting machine software and also replacing the paper records in transit requires the attacker to determine what votes were falsely produced by the voting machine and print replacement records in time to substitute them. While this is clearly possible, it raises a lot of operational difficulties – a single failed substitution leaves the possibility that the attack would be detected during the audit of ballots.

We have tried to keep these imperfections in mind when analyzing and discussing our least difficult attacks.

We suspect that much of the disagreement between voting officials and computer security experts in the last several years stems from a difference of opinion in prioritizing the difficulty of attacks. Election officials, with extensive experience in the logistics of handling tons of paper ballots, have little faith in paper and understand the kind of breakdowns in procedures that lead to traditional attacks like ballot box stuffing; in contrast, sophisticated attacks on computer voting systems appear very difficult to many of them. Computer security experts understand sophisticated attacks on computer systems, and recognize the availability of tools and expertise that makes these attacks practical to launch, but have no clear idea how they would manage the logistics of attacking a paper-based system. Looking at attack team size is one way to bridge this difference in perspective.

EFFECTS OF IMPLEMENTING COUNTERMEASURE SETS

The final step of our threat analysis is to measure the effect of certain countermeasures against the catalogued attacks. How much more difficult would the attacks become once the countermeasures are put into effect? How many more informed participants (if any) would be needed to counter or defeat these countermeasures?

Our process for examining the effectiveness of a countermeasure mirrors the process for determining the difficulty of an attack: we first asked whether the countermeasure would allow us to detect an attack with near certainty. If we agreed that the countermeasure would expose the attack, we identified the steps that would be necessary to circumvent or defeat the countermeasure. For each step to defeat the countermeasure, we determined the number of additional informed participants (if any) that an attacker would need to add to his team. As with the process for determining attack difficulty, the Brennan Center interviewed numerous election officials to see whether they agreed with the steps and values assigned. When necessary, the values and steps for defeating the countermeasures were altered to reflect the input of election officials.

COUNTERMEASURES EXAMINED

BASIC SET OF COUNTERMEASURES

The first set of countermeasures we looked at is the “Basic Set” of countermeasures. This Basic Set was derived from security survey responses³⁶ we received

from county election officials around the country, as well as additional interviews with more than a dozen current and former election officials. Within the Basic Set of countermeasures are the following procedures:

Inspection

The jurisdiction is not knowingly using any uncertified software that is subject to inspection by the Independent Testing Authority (often referred to as the "ITA").³⁷

Physical Security for Machines

- Ballot boxes (to the extent they exist) are examined (to ensure they are empty) and locked by poll workers immediately before the polls are opened.
- Before and after being brought to the polls for Election Day, voting systems for each county are locked in a single room in a county warehouse.
- The warehouse has perimeter alarms, secure locks, video surveillance and regular visits by security guards.
- Access to the warehouse is controlled by sign-in, possibly with card keys or similar automatic logging of entry and exit for regular staff.
- Some form of "tamper evident" seals are placed on machines before and after each election.
- The machines are transported to polling locations five to fifteen days before Election Day.

Chain of Custody/Physical Security of Election Day Records

- At close of the polls, vote tallies for each machine are totaled and compared with number of persons that have signed the poll books.
- A copy of totals for each machine is posted at each polling place on Election Night and taken home by poll workers to check against what is posted publicly at election headquarters, on the web, in the papers, or elsewhere.³⁸
- All audit information (*i.e.*, Event Logs, VVPT records, paper ballots, machine printouts of totals) that is not electronically transmitted as part of the unofficial upload to the central election office, is delivered in official, sealed and hand-delivered information packets or boxes. All seals are numbered and tamper-evident.
- Transportation of information packets is completed by two election officials representing opposing parties who have been instructed to remain in joint custody of the information packets or boxes from the moment it leaves the precinct to the moment it arrives at the county election center.

Voting Fraud and Voter Intimidation – Preliminary Research & Recommendations

- Each polling place sends its information packets or boxes to the county election center separately, rather than having one truck or person pick up this data from multiple polling locations.
- Once the sealed information packets or boxes have reached the county election center, they are logged. Numbers on the seals are checked to ensure that they have not been replaced. Any broken or replaced seals are logged. Intact seals are left intact.
- After the packets and/or boxes have been logged, they are provided with physical security precautions at least as great as those listed for voting machines, above. Specifically, for Pennasota, we have assumed the room in which the packets are stored have perimeter alarms, secure locks, video surveillance and regular visits by security guards and county police officers; and access to the room is controlled by sign-in, possibly with card keys or similar automatic logging of entry and exit for regular staff.

Testing³⁹

- An Independent Testing Authority has certified the model of voting machine used in the polling place.
- Acceptance Testing⁴⁰ is performed on machines at time, or soon after they are received by County.
- Pre-election Logic and Accuracy⁴¹ testing is performed by the relevant election official.
- Prior to opening the polls, every voting machine and vote tabulation system is checked to see that it is still configured for the correct election, including the correct precinct, ballot style, and other applicable details.

REGIMEN FOR AUTOMATIC ROUTINE AUDIT PLUS BASIC SET OF COUNTERMEASURES.

The second set of countermeasures is the Regimen for an Automatic Routine Audit Plus Basic Set of Countermeasures.

Some form of routine auditing of voter-verified paper records occurs in 12 states, to test the accuracy of electronic voting machines. They generally require between 1 and 10% of all precinct voting machines to be audited after each election. ⁴²

Jurisdictions can implement this set of countermeasures only if their voting systems produce some sort of voter-verified paper record of each vote. This could be in the form of a paper ballot, in the case of PCOS, or a voter-verified paper trail ("VVPT"), in the case of DREs.

We have assumed that jurisdictions take the following steps when conducting an Automatic Routine Audit (when referring to this set of assumptions "Regimen for an Automatic Routine Audit"):

The Audit

- Leaders of the major parties in each county are responsible for selecting a sufficient number of audit-team members to be used in that county.⁴³
- Using a highly transparent random selection mechanism (*see point ii, below*), the voter-verified paper records for between a small percentage of all voting machines in the State are selected for auditing.
- Using a transparent random selection method, auditors are assigned to the selected machines (two or three people, with representatives of each major political party, would comprise each audit team).
- The selection of voting machines, and the assignment of auditors to machines, occurs immediately before the audits take place. The audits take place as soon after polls close as possible – for example, at 9 a.m. the morning after polls close.
- Using a transparent random selection method, county police officers, security personnel and the video monitor assigned to guard the voter-verified records are chosen from a large pool of on-duty officers and employees on election night.
- The auditors are provided the machine tallies and are able to see that the county tally reflects the sums of the machine tallies before the start of the inspection of the paper.
- The audit would include a tally of spoiled ballots (in the case of VVPT, the number of cancellations recorded), overvotes, and undervotes.

Transparent Random Selection Process

In this report, we have assumed that random auditing procedures are in place for both the Regimen for an Automatic Routine Audit and Regimen for Parallel Testing. We have further assumed procedures to prevent a single, corrupt person from being able to fix the results. This implies a kind of transparent and public random procedure.

For the Regimen for an Automatic Routine Audit there are at least two places where transparent, random selection processes are important: in the selection of precincts to audit, and in the assignment of auditors to the precincts they will be auditing.

Good election security can employ Transparent Random Selection in other places with good effect:

- the selection of parallel testers from a pool of qualified individuals.
- the assignment of police and other security professionals from on-duty lists, to monitor key materials, for example, the VVPT records between the time that they arrive at election central and the time of the completion of the ARA.

If a selection process for auditing is to be trustworthy and trusted, ideally:

- The whole process will be publicly observable or videotaped;⁴⁴
- The random selection will be publicly verifiable, *i.e.*, anyone observing will be able to verify that the sample was chosen randomly (or at least that the number selected is not under the control of any small number of people); and
- The process will be simple and practical within the context of current election practice so as to avoid imposing unnecessary burdens on election officials.

There are a number of ways that election officials can ensure some kind of transparent randomness. One way would be to use a state lottery machine to select precincts or polling places for auditing. We have included two potential examples of transparent random selection processes in Appendix F. These apply to the Regimen for Parallel Testing as well.

REGIMEN FOR PARALLEL TESTING PLUS BASIC SET OF COUNTERMEASURES

The final set of countermeasures we have examined is “Parallel Testing” plus the Basic Set of countermeasures. Parallel Testing, also known as election-day testing, involves selecting voting machines at random and testing them as realistically as possible during the period that votes are being cast.

Parallel Testing

In developing our set of assumptions for Parallel Testing, we relied heavily upon interviews with Jocelyn Whitney, Project Manager for Parallel Testing in the State of California, and conclusions drawn from this Report.⁴⁵ In our analysis, we assume that the following procedures would be included in the Parallel Testing regimen (when referring to this regimen “Regimen for Parallel Testing”) that we evaluate:

- At least two of each DRE model (meaning both vendor and model) would be selected for Parallel Testing;
- At least two DREs from each of the three largest counties would be parallel tested;
- Counties to be parallel tested would be chosen by the Secretary of State in a transparent and random manner.
- Counties would be notified as late as possible that machines from one of their precincts would be selected for Parallel Testing;⁴⁶
- Precincts would be selected through a transparent random mechanism;
- A video camera would record testing;
- For each test, there would be one tester and one observer;

- Parallel Testing would occur at the polling place;
- The script for Parallel Testing would be generated in a way that mimics voter behavior and voting patterns for the polling place;
- At the end of the Parallel Testing, the tester and observer would reconcile vote totals in the script with vote totals reported on the machine.

Transparent Random Selection Process

We further assume that the same type of transparent random selection process that would be used for the Regimen for Automatic Routine Audit would also be employed for the Regimen for Parallel Testing to determine which machines would be subjected to testing on Election Day.

APPENDIX C

ALTERNATIVE SECURITY METRICS CONSIDERED

Dollars Spent

The decision to use the number of informed participants as the metric for attack level difficulty came after considering several other potential metrics. One of the first metrics we considered was the dollar cost of attacks. This metric makes sense when looking at attacks that seek financial gain – for instance, misappropriating corporate funds. It is not rational to spend \$100,000 on the misappropriation of corporate funds if the total value of those funds is \$90,000. Ultimately, we rejected this metric as the basis for our analysis because the dollar cost of the attacks we considered were dwarfed by both (1) current federal and state budgets, and (2) the amounts currently spent legally in state and federal political campaigns.

Time of Attack

The relative security of safes and other safety measures are often rated in terms of “time to defeat.” This was rejected as metric of difficulty because it did not seem relevant to voting systems. Attackers breaking into a house are concerned with the amount of time it might take to complete their robbery because the homeowners or police might show up. With regard to election fraud, many attackers may be willing to start months or years before an election if they believe they can control the outcome. As discussed *supra* at pp. 35–48, attackers may be confident that they can circumvent the independent testing authorities and other measures meant to identify attacks, so that the amount of time an attack takes becomes less relevant.

EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY

Comment (M1): HAVA §241(b)(6) refers to voting (rather than voter) fraud and 241(b)(7) refers to voter intimidation. Do we want to do a global change from voter fraud to voting fraud, or leave it as is?

INTRODUCTION

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and at times even the correct application of state or federal laws to the voting process. Past study of this topic has been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, EAC has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the true existence and enforcement of election crimes in this country.

PURPOSE AND METHODOLOGY OF THE EAC STUDY

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the U.S. Election Assistance Commission (EAC) to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation, listed in §§241(b)(6) and (7), were topics ~~was a topic~~ that EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. That type of research is well beyond the basic understanding that had to be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Tova Wang and Job Serebrov, who along with EAC staff and interns conducted the research that forms the basis of this report. The consultants ~~The c~~ were chosen based upon their experience with the topic ~~and~~. ~~In addition, consultants were chosen to assure a bipartisan representation in this study.~~ The consultants and EAC staff were charged ~~to:~~ (1) ~~to~~ research the current state of information on the topics of voter fraud and voter intimidation; (2) ~~to~~ develop a uniform definition of voter fraud and voter intimidation; and (3) ~~to~~ propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voter fraud and intimidation. In addition, EAC consultants conducted interviews with selected experts in the field. Last, EAC consultants and staff presented their study to a working group that provided feed back. The working group participants were:

The Honorable Todd Rokita
Indiana Secretary of State
Member, EAC Standards Board and the
Executive Board of the Standards Board

Kathy Rogers
Georgia Director of Elections, Office of
the Secretary of State
Member, EAC Standards Board

J.R. Perez
Guadalupe County Elections
Administrator, Texas

Barbara Arnwine
Executive Director, Lawyers Committee
for Civil Rights under Law
Leader of Election Protection Coalition

Benjamin L. Ginsberg
Partner, Patton Boggs LLP
Counsel to national Republican
campaign committees and Republican
candidates

Robert Bauer
Chair of the Political Law Practice at the
law firm of Perkins Coie, District of
Columbia
National Counsel for Voter Protection,
Democratic National Committee

Mark (Thor) Hearne II
Partner-Member, Lathrop & Gage, St
Louis, Missouri
National Counsel to the American
Center for Voting Rights

Barry Weinberg
Former Deputy Chief and Acting Chief,
Voting Section, Civil Rights Division,
U.S. Department of Justice

Technical Advisor:
Craig Donsanto
Director, Election Crimes Branch, U.S.
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, relevant cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited to produce this final report.

Comment [M2]: The consultants did not really summarize existing law.

EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. What the world knows about these issues comes largely from a very limited body of reports, articles and books.

There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

Reports and Studies of Voter Fraud and Intimidation

Over the years, there have been a number of studies and reports published conducted about ~~the concepts of~~ voter fraud and voter intimidation. EAC consultants reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “__”:

Articles and Reports

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.
- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.

- Alec Ewald, "A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law," The Sentencing Project, November 2005.
- American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.
- The Advancement Project, "America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy" November 7, 2001
- The Brennan Center and Professor Michael McDonald "Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General," The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."
- Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at http://www.democracy.ru/english/library/international/eng_1999-11.html
- People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>
- Craig Donsanto, "Prosecution of Electoral Fraud under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.
- General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," Report to Congressional Requesters, September 2005.

- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.
- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

Books

- John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation in the U.S. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District

Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate. Generally, speaking there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation and even legal practices that they allege suppress the vote.

One point of agreement is that absentee voting and voter registration by ~~third-party~~ nongovernmental groups has created opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with voters of a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

Comment [M3]: The term "third-party" is often used for minor political parties. As most of the voter registration drive problems have involved major party operatives and advocacy groups, "nongovernmental" seems a better choice.

Interviews with Experts

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included

Wade Henderson
Executive Director,
Leadership Conference for Civil Rights

Pat Rogers
Attorney, New Mexico

Wendy Weiser
Deputy Director,
Democracy Program, The Brennan
Center

Rebecca Vigil-Giron
Secretary of State, New Mexico

William Groth
Attorney for the plaintiffs in the Indiana
voter identification litigation

Sarah Ball Johnson
Executive Director,
State Board of Elections, Kentucky

Lori Minnite
Barnard College, Columbia University

Stephen Ansolobohere
Massachusetts Institute of Technology

Neil Bradley
ACLU Voting Rights Project

Chandler Davidson
Rice University

Nina Perales
Counsel,
Mexican American Legal Defense and
Education Fund

Tracey Campbell
Author, *Deliver the Vote*

Douglas Webber
Assistant Attorney General, Indiana

Heather Dawn Thompson

DRAFT – DO NOT DISTRIBUTE

Director of Government Relations,
National Congress of American Indians

Jason Torchinsky
Assistant General Counsel,
American Center for Voting Rights

Robin DeJarnette
Executive Director,
American Center for Voting Rights

Harry Van Sickle
Commissioner of Elections,
Pennsylvania

Joseph Sandler
Counsel
Democratic National Committee

John Ravitz
Executive Director
New York City Board of Elections

Sharon Priest
Former Secretary of State, Arkansas

Kevin Kennedy
Executive Director
State Board of Elections, Wisconsin

Evelyn Stratton
Justice
Supreme Court of Ohio

Tony Sirvello
Executive Director
International Association of Clerks,
Recorders, Election Officials and
Treasurers

Joseph Rich
Former Director
Voting Section, Civil Rights Division
U.S. Department of Justice

Craig Donsanto
Director, Public Integrity Section
U.S. Department of Justice

John Tanner
Director
Voting Section, Civil Rights Division
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud, citing as reasons that it was the most likely type of fraud to be discovered, and that there are stiff penalties associated with this type of fraud, and that it was an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, the location of polling places, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction. They can only prosecute election crimes related to elections with a federal candidate on the ballot and those committed by a public official under color of law involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement. Some including those that allege that prosecutions are not sufficiently aggressive. Others and those that feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “___”.

Case Law and Statutes

Consultants reviewed over 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from appeal courts. This is not a surprising situation, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “___”.

Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and

- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charge and prosecutions of voter fraud and intimidation throughout the country.

DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding of what is and what is not “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. In order to come up with a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

Fraud, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Comment [M4]: Sic? Or is this a typo?

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person

who knowingly provides false information to a voter about the location of the voter's polling place commits fraud on the voter.

The phrase "voter fraud" does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, "voter fraud" does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly refuses to register to vote an otherwise legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases "voter fraud" and "voter intimidation" are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the civil division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as "voter fraud" and "voter intimidation" that would serve as the basis ~~of~~ for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use legal election processes are well beyond the resources available to EAC. As such, EAC has defined "election crimes," a phrase that captures all crimes related to the voter registration and voting processes.

What is an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process, eligible persons to be excluded from the election process, ineligible votes to be cast in an election, eligible votes not to be cast or counted, or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception; acts of coercion; acts of damage or destruction; and failures or refusals to act.

Generally speaking, election crimes can be committed by voters, candidates, election officials, or any other members of the public that desire to criminally impact the result of an election. However, crimes that are based upon knowing or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

Comment [M5]: So this means that we will not look at civil actions involving Voting Rights Act violations, right?

The victim of an election crime can be a voter, a group of voters, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states ~~and~~ or the federal government consider criminal activity related to elections.

Acts of Deception

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, regarding the date and time of the election or regarding a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate at one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once at the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

Acts of Coercion

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other valuable thing to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his vote in any election, or who requires or demands an examination or inspection by himself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for registering to vote.

Acts of Damage or Destruction

- Destroying completed voter registration applications that are necessary for the applicants to exercise their right to vote;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments for the purpose of enabling the voter to vote his or her ballot;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as he intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

Formatted: Bullets and Numbering

Failure or Refusal to Act

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;

- o Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- o Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- o Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- o Distributing or attempting to distribute election material knowing it to be fraudulent;
- o Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction; and
- o Knowingly refusing to allow an eligible voter to cast his/her ballot.

What is not an Election Crime for Purposes of this Study

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal or civil violations related to campaign finance contribution limitations and prohibitions, as well as reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. The federal agency responsible for administering federal campaign finance law and monitoring the status of state campaign finance law is the Federal Election Commission (FEC).

Comment [M6]: Do we want to restrict our study to election crimes that affect federal elections only? HAVA §241(b)(6) specifically refers to “Nationwide statistics and methods of identifying, detecting, and investigating voting fraud in elections for Federal office” (Emphasis added.) That would mean we would also stay away from election crimes affecting ballot issues and elections with no federal candidate on the ballot.

Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes.” Last, actions that do not rise to the level of criminal activity, that is a misdemeanor, relative felony or felony, are not “election crimes.”

RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES

As a part of its study, EAC sought recommendations on ways that EAC can study the existence of election crimes. EAC consultants developed recommendations. In addition, the working group and some of the persons interviewed as a part of this study provided recommendations.

Recommendation 1: Conduct More Interviews

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

Recommendation 2: Follow Up on Media Research

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

Recommendation 3: Follow Up on Allegations Found in Literature Review

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a 1-800 voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints may provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety ~~in~~of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and monitor field reports from Election Day.

Recommendation 6: Review Reports Filed By District Election Officers

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud

and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

Recommendation 7: Attend Ballot Access and Voting Integrity Symposium

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants

Recommendation 8: Conduct Statistical Research

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have historically been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets. The sample must include a random set of counties where there have and have not been a large number of allegations

Recommendation 9: Explore Improvements to Federal Law

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

Recommendation 10: Use Observers to Collect Data on Election Day

Use observers to collect data regarding fraud and intimidation at the polls in on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and

concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

Recommendation 11: Study Absentee Ballot Fraud

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

Recommendation 12: Use Risk Analysis Methodology to Study Fraud

Conduct an analysis of what types of fraud people are most likely to commit. Researchers can use that risk analysis to rank the types of fraud based on the ease of commission and the impact of the fraud.

Recommendation 13: Conduct Research Using Database Comparisons

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether deceased voters or felons are noted as having actually voted.

Recommendation 14: Conduct a Study of Deceptive Practices

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation

EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

Recommendation 16: Examine the Use of Special Election Courts

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

Accepted Recommendations

There has never been a comprehensive national study that gathered data regarding all claims, charges and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine what volume and type of election crimes are being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

Survey Chief Election Officers Regarding Administrative Complaints

Likely sources of complaints concerning voting crimes are the administrative complaint processes that states were required to establish to as a part of complying with HAVA §402. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official and these complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have

identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and political pundits. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC through its clearinghouse role will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention and prosecution of election crimes.

been filed, investigated and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses can be collected.

Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred

Several chief state election officials have developed investigation units focused on receiving, investigating and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. This data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

Analyze Survey Data in Light of State Laws and Procedures

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter

Comment [M7]: Need to include survey of laws and procedures used to ID and prosecute election crime.

Comment [M8]: Need to include survey of laws and procedures used to ID and prosecute election crime.

Comment [M9]: Would this include the verification of information about current federal and state laws and procedures that may be used to pursue violations? We would need this information in order to better understand the data we collect.

*Mat's comment***EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY****INTRODUCTION**

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and at times even the correct application of state or federal laws to the voting process. Past study of this topic has been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, EAC has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the true existence and enforcement of election crimes in this country.

*Is it a
phrase
or
a separate
concept?***PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the U.S. Election Assistance Commission (EAC) to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation ^{as a topic} was a topic that EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. That type of research is well beyond the basic understanding that had to be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

*Good!
Clear
Statement*

To accomplish these tasks, EAC employed two consultants, who along with EAC staff and interns conducted the research that forms the basis of this report. Consultants were chosen based upon their experience with the topic. In addition, consultants were chosen to assure a bipartisan representation in this study. The consultants and EAC staff were charged (1) to research the current state of information on the topics of voter fraud and voter intimidation, (2) to develop a uniform definition of voter fraud and voter intimidation, and (3) to propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voter fraud and intimidation. In addition, EAC consultants conducted interviews with selected

experts in the field. Last, EAC consultants and staff presented their study to a working group that provided feed back. The working group participants were:

The Honorable Todd Rokita

Indiana Secretary of State
Member, EAC Standards Board and the
Executive Board of the Standards Board

Kathy Rogers

Georgia Director of Elections, Office of
the Secretary of State
Member, EAC Standards Board

J.R. Perez

Guadalupe County Elections
Administrator, Texas

Barbara Arnwine

Executive Director, Lawyers Committee
for Civil Rights under Law
Leader of Election Protection Coalition

Benjamin L. Ginsberg

Partner, Patton Boggs LLP
Counsel to national Republican
campaign committees and Republican
candidates

Robert Bauer

Chair of the Political Law Practice at the
law firm of Perkins Coie, District of
Columbia
National Counsel for Voter Protection,
Democratic National Committee

Mark (Thor) Hearne II

Partner-Member, Lathrop & Gage, St
Louis, Missouri
National Counsel to the American
Center for Voting Rights

Barry Weinberg

Former Deputy Chief and Acting Chief,
Voting Section, Civil Rights Division,
U.S. Department of Justice

Technical Advisor:

Craig Donsanto

Director, Election Crimes Branch, U.S.
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited to produce this final report.

EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. What the world knows about these issues comes largely from a very limited body of reports, articles and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation.

Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

Reports and Studies of Voter Fraud and Intimidation

Over the years, there have been a number of studies conducted about the concepts of voter fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “__”:

Articles and Reports

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.
- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.
- Alec Ewald, “A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law,” The Sentencing Project, November 2005.

- American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.

- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.

- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

Books

- John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate. Generally speaking there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation even legal practices that they allege suppress the vote.

One point of agreement is that absentee voting and voter registration by third-party groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of voters of a certain party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

Interviews with Experts

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included

Wade Henderson
Executive Director,
Leadership Conference for Civil Rights

Wendy Weiser
Deputy Director,
Democracy Program, The Brennan
Center

William Groth
Attorney for the plaintiffs in the Indiana
voter identification litigation

Lori Minnite
Barnard College, Columbia University

Neil Bradley
ACLU Voting Rights Project

Nina Perales
Counsel,
Mexican American Legal Defense and
Education Fund

Pat Rogers
Attorney, New Mexico

Rebecca Vigil-Giron
Secretary of State, New Mexico

Sarah Ball Johnson
Executive Director,
State Board of Elections, Kentucky

Stephen Ansolobhere
Massachusetts Institute of Technology

Chandler Davidson
Rice University

Tracey Campbell
Author, *Deliver the Vote*

Douglas Webber
Assistant Attorney General, Indiana

Heather Dawn Thompson
Director of Government Relations,
National Congress of American Indians

Jason Torchinsky
Assistant General Counsel,
American Center for Voting Rights

DRAFT -- DO NOT DISTRIBUTE

Robin DeJarnette
Executive Director,
American Center for Voting Rights

Evelyn Stratton
Justice
Supreme Court of Ohio

Harry Van Sickle
Commissioner of Elections,
Pennsylvania

Tony Sirvello
Executive Director
International Association of Clerks,
Recorders, Election Officials and
Treasurers

Joseph Sandler
Counsel
Democratic National Committee

Joseph Rich
Former Director
Voting Section, Civil Rights Division
U.S. Department of Justice

John Ravitz
Executive Director
New York City Board of Elections

Craig Donsanto
Director, Public Integrity Section
U.S. Department of Justice

Sharon Priest
Former Secretary of State, Arkansas

Kevin Kennedy
Executive Director
State Board of Elections, Wisconsin

John Tanner
Director
Voting Section, Civil Rights Division
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud, citing as reasons that it was the most likely type of fraud to be discovered and that there are stiff penalties associated with this type of fraud.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, the location of polling places, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies

have more time and resources but have limited jurisdiction. They can only prosecute crimes related to elections involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement, including those that allege that prosecutions are not sufficiently aggressive and those that feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “___”.

Case Law and Statutes

Consultants reviewed over 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from ~~appeal courts~~ ^{Courts of Appeal}. This is not a surprising situation, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “___”.

Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation

throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charge and prosecutions of voter fraud and intimidation throughout the country.

DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding of what is and what is not “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. In order to come up with a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

Fraud, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voter fraud” does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, “voter fraud” does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly

refuses to register to vote an otherwise legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

→ DOESN'T IT INVOLVE A VOTER?

To further complicate matters, the phrases “voter fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the civil division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voter fraud” and “voter intimidation” that would serve as the basis of a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

What is an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process, eligible persons to be excluded from the election process, ineligible votes to be cast in an election, eligible votes not to be cast or counted, or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Generally speaking, election crimes can be committed by voters, candidates, election officials, or any other members of the public that desire to criminally impact the result of an election. However, crimes that are based upon knowing or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

Acts of Deception

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, regarding the date and time of the election or regarding a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate at one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once at the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

Acts of Coercion

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other valuable thing to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his vote in any election, or who requires or demands an examination or inspection by himself or another of an employee's ballot;

DRAFT – DO NOT DISTRIBUTE

- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for registering to vote.

Acts of Damage or Destruction

- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments for the purpose of enabling the voter to vote his or her ballot;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as he intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

Failure or Refusal to Act

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

What is not an Election Crime for Purposes of this Study

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All crimes or civil violations related to campaign finance reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes.” Last, actions that do not rise to the level of criminal activity, that is a misdemeanor, relative felony or felony, are not “election crimes.”

RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES

As a part of its study, EAC sought recommendations on ways that EAC can study the existence of election crimes. EAC consultants ~~developed recommendations~~. In addition, the working group, and some of the persons interviewed as a part of this study provided recommendations.

Recommendation 1: Conduct More Interviews

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and parties should be interviewed. It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

Recommendation 2: Follow Up on Media Research

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

Recommendation 3: Follow Up on Allegations Found in Literature Review

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a 1-800 voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints may provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety in ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and monitor field reports from Election Day.

Recommendation 6: Review Reports Filed By District Election Officers

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

Recommendation 7: Attend Ballot Access and Voting Integrity Symposium

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the

National Voter Registration Act, and the Help America Vote Act are described and explained to participants

Recommendation 8: Conduct Statistical Research

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have historically been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets. The sample must include a random set of counties where there have and have not been a large number of allegations

Recommendation 9: Explore Improvements to Federal Law

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

Recommendation 10: Use Observers to Collect Data on Election Day

Use observers to collect data regarding fraud and intimidation at the polls in on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation.

Recommendation 11: Study Absentee Ballot Fraud

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

Recommendation 12: Use Risk Analysis Methodology to Study Fraud

Conduct an analysis of what types of fraud people are most likely to commit. Researchers can use that risk analysis to rank the types of fraud based on the ease of commission and the impact of the fraud.

Recommendation 13: Conduct Research Using Database Comparisons

007311

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether deceased voters or felons actually voted.

Recommendation 14: Conduct a Study of Deceptive Practices

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation

EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

Recommendation 16: Examine the Use of Special Election Courts

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

Accepted Recommendations

There has never been a comprehensive study that gathered data regarding all claims, charges and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine what volume and type of election crimes are being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

Survey Chief Election Officers Regarding Administrative Complaints

Likely sources of complaints concerning voting crimes are the administrative complaint processes that states were required to establish as a part of complying with HAVA. Those complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints under those procedures with the state's chief election official and those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses can be collected.

Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred

Several chief state election officials have developed investigation units focused on receiving, investigating and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. This data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

Analyze Survey Data in Light of State Laws and Procedures

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and political pundits. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC through its clearinghouse role will collect and analyze data on election crimes throughout the country. ~~These~~ ^{These} data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention and prosecution of election crimes.

2 defacto common

EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY

INTRODUCTION

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and at times even the correct application of state or federal laws to the voting process. Past study of this topic ^{have} ~~has~~ been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, EAC has begun this phase one of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the true existence and enforcement of election crimes in this country.

PURPOSE AND METHODOLOGY OF THE EAC STUDY

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the U.S. Election Assistance Commission (EAC) to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation was a topic that EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. That type of research is well beyond the basic understanding that had to be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine, and in some cases limit, the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, who along with EAC staff and interns conducted the research that forms the basis of this report. Consultants were chosen based upon their experience with the topic. In addition, consultants were chosen to assure a bipartisan representation in this study. The consultants and EAC staff were charged (1) to research the current state of information on the topics of voter fraud and voter intimidation, (2) to develop a uniform definition of voter fraud and voter intimidation, and (3) to propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voter fraud and intimidation. In addition, EAC consultants conducted interviews with selected

DRAFT

experts in the field. Last, EAC consultants and staff presented their study to a working group that provided feed back. The working group participants were:

The Honorable Todd Rokita

Indiana Secretary of State
Member, EAC Standards Board and the
Executive Board of the Standards Board

Kathy Rogers

Georgia Director of Elections, Office of
the Secretary of State
Member, EAC Standards Board

J.R. Perez

Guadalupe County Elections
Administrator, Texas

Barbara Arnwine

Executive Director, Lawyers Committee
for Civil Rights under Law
Leader of Election Protection Coalition

Benjamin L. Ginsberg

Partner, Patton Boggs LLP
Counsel to national Republican
campaign committees and Republican
candidates

Robert Bauer

Chair of the Political Law Practice at the
law firm of Perkins Coie, District of
Columbia
National Counsel for Voter Protection,
Democratic National Committee

Mark (Thor) Hearne II

Partner-Member, Lathrop & Gage, St
Louis, Missouri
National Counsel to the American
Center for Voting Rights

Barry Weinberg

Former Deputy Chief and Acting Chief,
Voting Section, Civil Rights Division,
U.S. Department of Justice

Technical Advisor:

Craig Donsanto

Director, Election Crimes Branch, U.S.
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope, and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was ~~vetted and~~ edited to produce this final report.

EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. What the world knows about these issues comes largely from a very limited body of reports, articles and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation.

FILE COPY
FILE COPY
FILE COPY

Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

Reports and Studies of Voter Fraud and Intimidation

Over the years, there have been a number of studies conducted about the concepts of voter fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “__”:

Articles and Reports

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.
- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.
- Alec Ewald, “A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law,” The Sentencing Project, November 2005.

- American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.
- The Advancement Project, "America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy" November 7, 2001
- The Brennan Center and Professor Michael McDonald "Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General," The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."
- Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at http://www.democracy.ru/english/library/international/eng_1999-11.html
- People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>
- Craig Donsanto, "Prosecution of Electoral Fraud under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.
- General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," Report to Congressional Requesters, September 2005.
- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," *Demos: A Network of Ideas and Action*, 2003.

- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

Books

- John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate. Generally speaking, there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, ^{and} even legal practices that they allege suppress the vote.

One point of agreement is that absentee voting and voter registration by third-party groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of voters of a certain party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

Is there anything we can say about absentee fraud? details focus only on VR and give no detail on absentee

Interviews with Experts

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included

Wade Henderson
Executive Director,
Leadership Conference for Civil Rights

Rebecca Vigil-Giron
Secretary of State, New Mexico

Wendy Weiser
Deputy Director,
Democracy Program, The Brennan
Center

Sarah Ball Johnson
Executive Director,
State Board of Elections, Kentucky

William Groth
Attorney for the plaintiffs in the Indiana
voter identification litigation

Stephen Ansolobhere
Massachusetts Institute of Technology

Lori Minnite
Barnard College, Columbia University

Chandler Davidson
Rice University

Neil Bradley
ACLU Voting Rights Project

Tracey Campbell
Author, *Deliver the Vote*

Nina Perales
Counsel,
Mexican American Legal Defense and
Education Fund

Douglas Webber
Assistant Attorney General, Indiana

Pat Rogers
Attorney, New Mexico

Heather Dawn Thompson
Director of Government Relations,
National Congress of American Indians

Jason Torchinsky
Assistant General Counsel,
American Center for Voting Rights

Robin DeJarnette
Executive Director,
American Center for Voting Rights

Harry Van Sickle
Commissioner of Elections,
Pennsylvania

Joseph Sandler
Counsel
Democratic National Committee

John Ravitz
Executive Director
New York City Board of Elections

Sharon Priest
Former Secretary of State, Arkansas

Kevin Kennedy
Executive Director
State Board of Elections, Wisconsin

Evelyn Stratton
Justice
Supreme Court of Ohio

Tony Sirvello
Executive Director
International Association of Clerks,
Recorders, Election Officials and
Treasurers

Joseph Rich
Former Director
Voting Section, Civil Rights Division
U.S. Department of Justice

Craig Donsanto
Director, Public Integrity Section
U.S. Department of Justice

John Tanner
Director
Voting Section, Civil Rights Division
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud, citing as reasons that it was the most likely type of fraud to be discovered and that there are stiff penalties associated with this type of fraud.

> awkward sentence

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, the location of polling places, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies

have more time and resources but have limited jurisdiction. They can only prosecute crimes related to elections involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement, including those that allege that prosecutions are not sufficiently aggressive and those that feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “___”.

Case Law and Statutes

Consultants reviewed over 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from appeal courts. This is not a surprising situation, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “___”.

Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation

throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges, and prosecutions of voter fraud and intimidation throughout the country.

DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding of what is and what is not “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. In order to come up with a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

Fraud, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

indent → Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voter fraud” does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, “voter fraud” does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly

refuses to register to vote an otherwise legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases “voter fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voter fraud” and “voter intimidation” that would serve as the basis of a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

What is an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception; acts of coercion; acts of damage or destruction; and failures or refusals to act.

~~Generally speaking,~~ Election crimes can be committed by voters, candidates, election officials, or any other members of the public that desire to criminally impact the result of an election. However, crimes that are based upon knowing or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

Acts of Deception

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, regarding the date and time of the election or regarding a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate ~~at~~ⁱⁿ one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter;
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once at the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

~~Acts of Coercion~~

Acts of Coercion

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage, harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other valuable thing to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his vote in any election, or who requires or demands an examination or inspection by himself or another of an employee's ballot;

- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for registering to vote.

Acts of Damage or Destruction

- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments for the purpose of enabling the voter to vote his or her ballot;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as he intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

Failure or Refusal to Act

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

What is not an Election Crime for Purposes of this Study

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All crimes or civil violations related to campaign finance reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes.” Last, actions that do no rise to the level of criminal activity, that is a misdemeanor, relative felony or felony, are not “election crimes.”

RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES

As a part of its study, EAC sought recommendations on ways that EAC can study the existence of election crimes. EAC consultants developed recommendations. In addition, the working group and some of the persons interviewed as a part of this study provided recommendations.

Recommendation 1: Conduct More Interviews

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and parties should be interviewed. It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

Recommendation 2: Follow Up on Media Research

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

Recommendation 3: Follow Up on Allegations Found in Literature Review

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a ~~1-800~~^{1-800 free} voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints may provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

} not scientific
at all!
definite bias

Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation, attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and monitor field reports from Election Day.

Recommendation 6: Review Reports Filed By District Election Officers

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

→ election crimes?

Recommendation 7: Attend Ballot Access and Voting Integrity Symposium

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues ^{are} presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the

National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

Recommendation 8: Conduct Statistical Research

not statistical research

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have historically been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets. The sample must include a random set of counties where there have and have not been a large number of allegations

what data would be collected?

Recommendation 9: Explore Improvements to Federal Law

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

Recommendation 10: Use Observers to Collect Data on Election Day

Use observers to collect data regarding fraud and intimidation at the polls ~~in~~ on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation.

Fed Gov already has observers

Recommendation 11: Study Absentee Ballot Fraud

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

Recommendation 12: Use Risk Analysis Methodology to Study Fraud

Conduct an analysis of what types of fraud people are most likely to commit. Researchers can use that risk analysis to rank the types of fraud based on the ease of commission and the impact of the fraud.

Recommendation 13: Conduct Research Using Database Comparisons

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether deceased voters or felons actually voted.

HAVA
Issues

Recommendation 14: Conduct a Study of Deceptive Practices

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

Recommendation 15: Study Use of HAVA Administrative Complaint Procedures as Vehicle for Measuring Fraud and Intimidation

EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

Recommendation 16: Examine the Use of Special Election Courts

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

Accepted Recommendations

There has never been a comprehensive study that gathered data regarding all claims, charges and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine what volume and type of election crimes are being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

Survey Chief Election Officers Regarding Administrative Complaints

Likely sources of complaints concerning ^{election} ~~voting~~ crimes are the administrative complaint ~~procedures~~ ^{processes} that states were required to establish as a part of complying with HAVA. Those complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints under those procedures with the state's chief election official and those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses can be collected.

Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred

Several chief state election officials have developed investigation units focused on receiving, investigating and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. This data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

Analyze Survey Data in Light of State Laws and Procedures

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and political pundits. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. ⁷¹¹ ~~These data not only~~ will tell us what types of election crimes are committed ~~and where fraud exists,~~ but also inform us of what factors impact the existence, prevention and prosecution of election crimes.

GAVIN'S
COMMENTSEAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY

INTRODUCTION

Confidential
Voting fraud and intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the ~~correct~~ application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed ~~a definition of~~ *walking* election crimes and adopted ~~some~~ research methodology on how to assess the existence and enforcement of election crimes in this country.

PURPOSE AND METHODOLOGY OF THE EAC STUDY

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC, as well as its advisory boards, felt were important to study to help improve the administration of elections for federal office.

12
EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition ~~had to~~ *was* be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

along side
To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,¹ who worked ~~with~~ *along side* EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and to assure a bipartisan representation in this study. The consultants and EAC staff were charged to (1) research the current state of information on the topic of voting

under the supervision of

¹ Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

fraud and voter intimidation; (2) develop a uniform definition of voting fraud and voter intimidation; and (3) propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

The Honorable Todd Rokita
Indiana Secretary of State
Member, EAC Standards Board and the
Executive Board of the Standards Board

Kathy Rogers
Georgia Director of Elections, Office of
the Secretary of State
Member, EAC Standards Board

J.R. Perez
Guadalupe County Elections
Administrator, Texas

Barbara Arnwine
Executive Director, Lawyers Committee
for Civil Rights under Law
Leader of Election Protection Coalition

Benjamin L. Ginsberg
Partner, Patton Boggs LLP
Counsel to national Republican
campaign committees and Republican
candidates

Robert Bauer
Chair of the Political Law Practice at the
law firm of Perkins Coie, District of
Columbia
National Counsel for Voter Protection,
Democratic National Committee

Mark (Thor) Hearne II
Partner-Member, Lathrop & Gage, St
Louis, Missouri
National Counsel to the American
Center for Voting Rights

Barry Weinberg
Former Deputy Chief and Acting Chief,
Voting Section, Civil Rights Division,
U.S. Department of Justice

Technical Advisor:
Craig Donsanto
Director, Election Crimes Branch, U.S.
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

Reports and Studies of Voting fraud and Intimidation

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

Articles and Reports

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.

- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, "Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?" A Report to the Center for Voting Rights & Protection, September, 2004.
- Alec Ewald, "A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law," The Sentencing Project, November 2005.
- American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.
- The Advancement Project, "America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy" November 7, 2001
- The Brennan Center and Professor Michael McDonald "Analysis of the September 15, 2005 Voting fraud Report Submitted to the New Jersey Attorney General," The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."
- Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at http://www.democracy.ru/english/library/international/eng_1999-11.html
- People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>
- Craig Donsanto, "Prosecution of Electoral Fraud under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.

- General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," Report to Congressional Requesters, September 2005.
- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.
- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

Books

- John Fund, *Stealing Elections: How Voting fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, even legal practices, that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

Interviews with Experts

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

Wade Henderson
Executive Director,
Leadership Conference for Civil Rights

Wendy Weiser
Deputy Director,
Democracy Program, The Brennan
Center

William Groth
Attorney for the plaintiffs in the Indiana
voter identification litigation

Lori Minnite
Barnard College, Columbia University

Neil Bradley
ACLU Voting Rights Project

Pat Rogers
Attorney, New Mexico

Nina Perales
Counsel,
Mexican American Legal Defense and
Education Fund

Rebecca Vigil-Giron
Secretary of State, New Mexico

Sarah Ball Johnson
Executive Director,
State Board of Elections, Kentucky

Stephen Ansolobohere
Massachusetts Institute of Technology

Chandler Davidson
Rice University

Tracey Campbell

Author, *Deliver the Vote*

Douglas Webber

Assistant Attorney General, Indiana

Heather Dawn Thompson

Director of Government Relations,
National Congress of American Indians

Jason Torchinsky

Assistant General Counsel,
American Center for Voting Rights

Robin DeJarnette

Executive Director,
American Center for Voting Rights

Harry Van Sickle

Commissioner of Elections,
Pennsylvania

Tony Sirvello

Executive Director
International Association of Clerks,
Recorders, Election Officials and
Treasurers

Joseph Sandler

Counsel
Democratic National Committee

John Ravitz

Executive Director
New York City Board of Elections

Sharon Priest

Former Secretary of State, Arkansas

Kevin Kennedy

Executive Director
State Board of Elections, Wisconsin

Evelyn Stratton

Justice
Supreme Court of Ohio

Joseph Rich

Former Director
Voting Section, Civil Rights Division
U.S. Department of Justice

Craig Donsanto

Director, Public Integrity Section
U.S. Department of Justice

John Tanner

Director
Voting Section, Civil Rights Division
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it was the most likely type of fraud to be discovered, the stiff penalties associated with this type of fraud, and that it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix "3".

Case Law and Statutes

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. ^{Very few} ~~Very few cases that are decided~~ ^{decisions} at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix "4".

Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters, ^{on news herolds?}
- multiple voting,
- felons voting, —

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. ~~Upon further inspection, however, it is~~ ^{It is} apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and ~~appropriate~~ activities. ~~To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.~~

New Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

Fraud, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voting fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter

registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing "voting fraud." Similarly, a person who knowingly provides false information to a voter about the location of the voter's polling place commits fraud on the voter.

if given it plan wrong,
The phrase "voting fraud" does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, "voting fraud" does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases "voting fraud" and "voter intimidation" are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

Decided to use system
The goal of this study was to develop a common definition of what is generically referred to as "voting fraud" and "voter intimidation" that would serve as the basis for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined "election crimes," a phrase that captures all crimes related to the voter registration and voting processes.

The Definition of an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

need transition to the crimes and determine use explained of why civil is being chosen

for the purpose of this study

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting (either early, absentee, or election day), vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

Acts of Deception

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

Acts of Coercion

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

Acts of Damage or Destruction

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

Failure or Refusal to Act

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;

- o Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- o Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- o Distributing or attempting to distribute election material knowing it to be fraudulent;
- o Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- o Knowingly removing the eligibility status of a voter who is eligible to vote; and
- o Knowingly refusing to allow an eligible voter to cast his/her ballot.

What is not an Election Crime for Purposes of this Study

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of "election crimes." All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not "election crimes" for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not "election crimes," even when those offenses occur in a polling place, voter registration office, or a candidate's office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate's office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not "election crimes," and actions that do not rise to the level of criminal activity, such as a misdemeanor, relative felony or felony, are not "election crimes."

RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

Recommendation 1: Conduct More Interviews

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers ("DEOs") and local district attorneys, as well as civil and criminal defense attorneys.

Recommendation 2: Follow Up on Media Research

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such

activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

Recommendation 3: Follow Up on Allegations Found in Literature Review

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” from Election Day.

Recommendation 6: Review Reports Filed By District Election Officers

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

Recommendation 7: Attend Ballot Access and Voting Integrity Symposium

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

Recommendation 8: Conduct Statistical Research

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

Recommendation 9: Explore Improvements to Federal Law

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

Recommendation 10: Use Observers to Collect Data on Election Day

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

Recommendation 11: Study Absentee Ballot Fraud

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

Recommendation 12: Use Risk Analysis Methodology to Study Fraud

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

Recommendation 13: Conduct Research Using Database Comparisons

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

Recommendation 14: Conduct a Study of Deceptive Practices

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

Recommendation 16: Examine the Use of Special Election Courts

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

Accepted Recommendations

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

Survey Chief Election Officers Regarding Administrative Complaints

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition

what about
statistop
revenue

of election crimes provided above in this report in its survey so that data regarding a
uniform set of offenses will be collected.

Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

Analyze Survey Data in Light of State Laws and Procedures

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from

areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY**INTRODUCTION**

Voting fraud and voter intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and voter intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the correct application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the existence and enforcement of election crimes in the United States.

PURPOSE AND METHODOLOGY OF THE EAC STUDY

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. ^{initial} This study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,¹ who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and the need to assure a bipartisan representation in this study. The consultants and EAC staff were charged with (1) researching the current state of information on the topic of voting fraud and voter intimidation; (2) developing a uniform definition of voting

¹ Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

fraud and voter intimidation; and (3) proposing recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

The Honorable Todd Rokita
Indiana Secretary of State
Member, EAC Standards Board and the
Executive Board of the Standards Board

Kathy Rogers
Georgia Director of Elections, Office of
the Secretary of State
Member, EAC Standards Board

J.R. Perez
Guadalupe County Elections
Administrator, Texas

Barbara Arnwine
Executive Director, Lawyers Committee
for Civil Rights under Law
Leader of Election Protection Coalition

Benjamin L. Ginsberg
Partner, Patton Boggs LLP
Counsel to National Republican
Campaign Committees and Republican
candidates

Robert Bauer
Chair of the Political Law Practice at the
law firm of Perkins Coie, District of
Columbia
National Counsel for Voter Protection,
Democratic National Committee

Mark (Thor) Hearne II
Partner-Member, Lathrop & Gage, St
Louis, Missouri
National Counsel to the American
Center for Voting Rights

Barry Weinberg
Former Deputy Chief and Acting Chief,
Voting Section, Civil Rights Division,
U.S. Department of Justice

Technical Advisor:
Craig Donsanto
Director, Election Crimes Branch, U.S.
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and voter intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

Reports and Studies of Voting fraud and Intimidation

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

Articles and Reports

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or voter intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 Presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, including legal practices that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. For example, a number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

Interviews with Experts

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

Wade Henderson
Executive Director,
Leadership Conference for Civil Rights

Wendy Weiser
Deputy Director,
Democracy Program, The Brennan
Center

William Groth
Attorney for the plaintiffs in the Indiana
voter identification litigation

Lori Minnite
Barnard College, Columbia University

Neil Bradley
ACLU Voting Rights Project

Pat Rogers
Attorney, New Mexico

Nina Perales
Counsel,
Mexican American Legal Defense and
Education Fund

Rebecca Vigil-Giron
Secretary of State, New Mexico

Sarah Ball Johnson
Executive Director,
State Board of Elections, Kentucky

Stephen Ansolobohere
Massachusetts Institute of Technology

Chandler Davidson
Rice University

Tracey Campbell

Author, *Deliver the Vote*

Douglas Webber

Assistant Attorney General, Indiana

Heather Dawn Thompson

Director of Government Relations,
National Congress of American Indians

Jason Torchinsky

Assistant General Counsel,
American Center for Voting Rights

Robin DeJarnette

Executive Director,
American Center for Voting Rights

Harry Van Sickle

Commissioner of Elections,
Pennsylvania

Tony Sirvello

Executive Director
International Association of Clerks,
Recorders, Election Officials and
Treasurers

Joseph Sandler

Counsel
Democratic National Committee

John Ravitz

Executive Director
New York City Board of Elections

Sharon Priest

Former Secretary of State, Arkansas

Kevin Kennedy

Executive Director
State Board of Elections, Wisconsin

Evelyn Stratton

Justice
Supreme Court of Ohio

Joseph Rich

Former Director
Voting Section, Civil Rights Division
U.S. Department of Justice

Craig Donsanto

Director, Public Integrity Section
U.S. Department of Justice

John Tanner

Director
Voting Section, Civil Rights Division
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it is the most likely type of fraud to be discovered, there are stiff penalties associated with this type of fraud, and it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix "3".

Case Law and Statutes

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix "4".

Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

New Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

Fraud, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

“Voting” is the act of casting votes to decide an issue or contest. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voting fraud,” it means fraudulent or deceptive acts committed to influence the act of voting. Thus, a voter who intentionally impersonates another registered voter and attempts to

vote for that person would be committing “voting fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voting fraud” does not capture a myriad of other criminal acts that are related to elections which are not related to the act of voting and/or do not involve an act of deception. For example, “voting fraud” does not capture actions or willful inaction in the voter registration process. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the act of voting nor an act of deception.

To further complicate matters, the phrases “voting fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voting fraud” and “voter intimidation” that would serve as the basis for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

The Definition of an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or on election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

Acts of Deception

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making or knowingly possessing a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a materially false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

Acts of Coercion

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
